Preface	ix
Acknowledgments	xvi
About the Author	xviii
PART I: INTRODUCTION TO PYTHON PROGRAMMING	1
Chapter 1: Introduction to Programming and Python	2
1.1 About Programming	2
1.2 Programs as Recipes	4
1.3 About Python	6
1.4 Programming with Python	7
Chapter Review	9
Key Terms	9
Chapter 2: Variables and Statements	10
2.1 About Constants, Variables, and Statements	10
2.2 Variables	11
2.3 Python's Basic Types	15
2.4 More on Input and Output	18
2.5 Mathematical Statements	21
2.6 More about Math	23
2.7 More about Strings	25
Chapter Review	27
Key Terms	28
Programming Problems	28
Chapter 3: Decisions	32
3.1 About Decisions in Programs	32
3.2 Multi-way Decisions	35
3.3 Nested (Sequential) Decisions	39
3.4 More about Decisions	41
Chapter Review	44
Key Terms	45
Programming Problems	45
Chapter 4: Repetition	47
4.1 About Repetition	47
4.2 The <code>while</code> Statement	48
4.3 The <code>for</code> Statement, with <code>range()</code> Function	55
4.4 Using <code>while</code> vs. <code>for</code>	59
4.5 Infinite Loops	59
4.6 Adding Validation	60
4.7 About <code>break</code> and <code>continue</code>	63
Chapter Review	66
Key Terms	66
Programming Problems	67
Chapter 5: Defining Functions	70
5.1 Introduction to Functions	70
5.2 Multiple Parameters	75
5.3 More Function Features	78
5.4 Functions and the Console: Input and Output	80
5.5 A Function Calling Another Function	83
5.6 Some Further Design Points for Functions	84
5.7 Combining Concepts: Functions and Decisions	84
Chapter Review	86
Key Terms	86
Programming Problems	87
Chapter 6: Lists	90
6.1 About Lists	90
6.2 Creating Lists	91
6.3 Iterating over a List to Get a List's Items	95
6.4 Getting Part of a List with Slicing	96
6.5 Asking Questions of a List	98
6.6 Maintaining a List	98
6.7 Ordering a List: <code>sorted()</code> , <code>sort()</code> , <code>reverse()</code>	102
6.8 Representing a Table in a List	102
6.9 About Tuples—Unchangeable Lists	104
Chapter Review	104
Key Terms	105
Programming Problems	105

Chapter 7: Reading and Writing Files	108
7.1 About Files	108
7.2 Reading a File's Line	109
7.3 Reading a File's Lines with Repetition	110
7.4 Parsing a File's Fields	114
7.5 Writing a File	116
Chapter 8: Strings in Detail	124
8.1 String Basics Recap	124
8.2 Substrings (Slicing)	126
8.3 Searching Parts of Strings	127
8.4 Methods That Return String Variations	130
8.5 Checking Strings	133
8.6 Splitting Strings	135
8.7 An Example with Strings, Lists, and a File	137
Chapter Review	138
Key Terms	139
Programming Problems	139
Chapter 9: Dictionaries and Sets	141
9.1 About Dictionaries	141
9.2 Creating Dictionaries	143
9.3 Finding Data in a Dictionary	144
9.4 Using for to Access Dictionary Items	147
9.5 Storing Data Fields in Dictionaries	148
9.6 Maintaining Dictionaries	148
9.7 Sets	150
9.8 An Example with Dictionaries and Files	152
9.9 About the Hashable Type	154
Chapter Review	154
Key Terms	155
Programming Problems	155
PART II: PYTHON FOR DATA	157
Chapter 10: pandas DataFrames and Series	158
10.1 About pandas DataFrames and Series	158
10.2 Creating DataFrames	160
10.3 Getting Information about DataFrame Data	164
10.4 Getting Data: Columns, Rows, and Cells	169
10.5 Getting Data: Sorting, Filtering, Slicing, Looping	173
10.6 Missing Values	178
10.7 Maintaining DataFrame Data	180
10.8 Joining Two DataFrames	183
Chapter Review	185
Key Terms	186
Programming Problems	186
Chapter 11: pandas for Data Preparation	188
11.1 About Data Preparation	188
11.2 Numbers	190
11.3 Dates	196
11.4 Categories	198
11.5 Strings	203
11.6 Key Fields	206
11.7 Inter-field Checking	210
11.8 Finding Missing Related Rows between Tables	212
11.9 Reorganizing Table Layout	215
Chapter Review	218
Key Terms	219
Programming Problems	220
Chapter 12: Reading Web Pages with pandas and Beautiful Soup	221
12.1 About HTML, pandas, and Beautiful Soup	221
12.2 HTML	222
12.3 pandas read_html()	226
12.4 Beautiful Soup	230
Chapter Review	237
Key Terms	238
Programming Problems	238
Chapter 13: Accessing Web APIs with Requests and JSON	240
13.1 About Web APIs	240
13.2 A Simple Example: FX Rate	242
13.3 JSON	243
13.4 Query Parameters	246
13.5 JSON in the Request	247
13.6 Status Codes and Errors	248
13.7 Access Control	249
13.8 An Example Web API: Alpha Vantage Financial Data	250
13.9 An Example Web API: New York Times Top Stories	251
13.10 An Example Web API: Google Gemini API (Generative AI)	255
Chapter Review	258
Key Terms	258
Programming Problems	259

Chapter 14: Querying Databases with Python and SQL 260

14.1	Introduction to SQL, SQLite, and Python for SQL	260	14.6	Working with Database Servers and Python	275
14.2	Using Python to Query a SQLite Table	263		Chapter Review	278
14.3	Variations on Processing SQL Results	266		Key Terms	279
14.4	More about using Python with SQL	271		Programming Problems	280
14.5	About SQL Data Types and Python Data Types	274			

Chapter 15: Accessing Spreadsheets with pandas and openpyxl 281

15.1	About Spreadsheets and Python	281	15.5	Navigating Excel with openpyxl	289
15.2	Reading Excel Tables with pandas	282		Chapter Review	292
15.3	Combining Excel Tables with pandas	284		Key Terms	292
15.4	Reading Excel Data with openpyxl	286		Programming Problems	292

PART III: PYTHON FOR ANALYTICS 295**Chapter 16: Visualization 296**

16.1	About pandas, Matplotlib, and seaborn Charting	296	16.7	Health Club Membership Data	314
16.2	Electric Car Data	297	16.8	Health Club Membership Charts	316
16.3	Electric Car Adoption	298		Chapter Review	322
16.4	Electric Car Sales Charts	304		Key Terms	322
16.5	Stock Price Data	308		Programming Problems	322
16.6	Stock Price and Return Charts	311			

Chapter 17: Statistics 324

17.1	Descriptive Statistics	324	17.7	Analyzing a Relationship with Simple Regression	350
17.2	Summarizing Data with pandas Pivot Tables	332	17.8	Forecasting Using Multiple Regression	353
17.3	Analyzing Time Series with pandas Moving Statistics	337		Chapter Review	357
17.4	Comparing Populations	341		Key Terms	358
17.5	Confidence Intervals	344		Programming Problems	359
17.6	Reviewing a Distribution and Identifying Outliers	346			

Chapter 18: Text Analysis 361

18.1	About Text Analysis	361	18.5	Text Classification	377
18.2	Some Python Prerequisites	362		Chapter Review	382
18.3	Word Frequency	364		Key Terms	383
18.4	Sentiment Analysis	374		Programming Problems	383

Chapter 19: Simulation 384

19.1	About Simulation with Random Numbers	384	19.5	Stock and Option Simulation	399
19.2	Coin Tosses	385		Chapter Review	405
19.3	Dice Rolls	390		Key Terms	406
19.4	ATM Queueing Simulation	392		Programming Problems	407

APPENDIXES App-1**APPENDIX A AppA-1**

Appendix A is available online for users of the print edition. PDFs of Appendices A1–A8 can be freely downloaded at the Student Resources tab of the title's website: <https://www.prospectpressvt.com/textbooks/groner-python-2-0>.

Appendix A1: Getting Started with Jupyter Notebook AppA1-1

A1.1	Overview	AppA1-1	A1.7	Running and Clearing All	AppA1-4
A1.2	Getting and Installing	AppA1-1	A1.8	Creating and Renaming Files and Directories	AppA1-5
A1.3	Starting	AppA1-1	A1.9	Exiting Notebook Screens	AppA1-5
A1.4	Navigating and Running Notebooks	AppA1-2	A1.10	Opening a Previously Saved Notebook	AppA1-5
A1.5	Markdown	AppA1-4			
A1.6	Editing and Inserting Cells	AppA1-4			

Appendix A2: Getting Started with Google Colab				AppA2-1	
A2.1	Overview	AppA2-1	A2.6	Editing and Inserting Cells	AppA2-3
A2.2	Getting Started	AppA2-1	A2.7	Running and Clearing All	AppA2-3
A2.3	Starting	AppA2-1	A2.8	Exporting and Importing Notebooks	AppA2-3
A2.4	Entering and Running	AppA2-2	A2.9	Loading Data Files to Your Colab Session	AppA2-3
A2.5	Text	AppA2-2	A2.10	Opening a Previously Saved Notebook	AppA2-4
Appendix A3: Getting Started with Thonny				AppA3-1	
A3.1	Overview	AppA3-1	A3.3	Using Python Interactively in Thonny	AppA3-2
A3.2	Installing Thonny	AppA3-1	A3.4	Running Python Programs in Thonny	AppA3-3
Appendix A4: Getting Started with Spyder				AppA4-1	
A4.1	Overview	AppA4-1	A4.3	Using Python Interactively in Spyder	AppA4-1
A4.2	Installing Spyder	AppA4-1	A4.4	Running Python Programs in Spyder	AppA4-2
Appendix A5: Getting Started with PyCharm				AppA5-1	
A5.1	Overview	AppA5-1	A5.3	Using Python Interactively in PyCharm	AppA5-1
A5.2	Installing PyCharm	AppA5-1	A5.4	Running Python Programs in PyCharm	AppA5-3
Appendix A6: Getting Started with Visual Studio Code				AppA6-1	
A6.1	Overview	AppA6-1	A6.3	Entering and Running a Python Program in VS Code	AppA6-2
A6.2	Installing VS Code	AppA6-1	A6.4	Running Python Programs in VS Code	AppA6-3
Appendix A7: Getting Started with Anaconda				AppA7-1	
A7.1	Overview	AppA7-1			
Appendix A8: Getting Started with Third-Party Packages				AppA8-1	
A8.1	Overview	AppA8-1	A8.3	Packages Used in This Book	AppA8-1
A8.2	Installing Packages	AppA8-1			
Appendix B: Importing Packages and Modules				AppB-1	
B.1	About Modules, Packages, and Importing	AppB-1	B.4	<code>from/import</code>	AppB-2
B.2	<code>import</code>	AppB-1	B.5	Multifile Applications	AppB-2
B.3	Third-Party Packages	AppB-2			
Appendix C: Formatting				AppC-1	
C.1	About Formatting	AppC-1	C.3	Python f-strings	AppC-2
C.2	Python <code>format()</code> Function	AppC-1	C.4	Python Dates	AppC-3
Appendix D: Handling Errors with Exceptions				AppD-1	
D.1	About Exceptions	AppD-1	D.4	<code>finally</code>	AppD-2
D.2	<code>try/except</code>	AppD-1	D.5	Exceptions and Functions	AppD-2
D.3	Exception Types and Multiple Error Handling	AppD-2			
Appendix E: Defining Classes: Object-Oriented Programming				AppE-1	
E.1	About Object-Oriented Programming	AppE-1	E.4	Adding a Class Variable: Rounding	AppE-4
E.2	An Example with Properties and Methods: Mortgage	AppE-1	E.5	Adding a Method That Calls Another Method	AppE-5
E.3	Adding <code>__str__()</code> and <code>__repr__()</code> Methods	AppE-3	E.6	Adding a Static Method: <code>validate()</code>	AppE-5
			E.7	The Complete Mortgage Class	AppE-6
Appendix F: Reading Files in Brief				AppF-1	
F.1	Reading Lines of a File	AppF-1	F.4	Reading Comma-Separated Value (csv) Files with <code>csv.DictReader</code>	AppF-3
F.2	Reading Comma-Separated Value (csv) Files	AppF-2			
F.3	Reading Comma-Separated Value (csv) Files with <code>csv.reader</code>	AppF-2			

Appendix G: Lists in Brief				AppG-1
G.1	About Lists	AppG-1	G.4 Asking Questions of a List	AppG-2
G.2	Creating Lists	AppG-1	G.5 About Tuples—Unchangeable Lists	AppG-3
G.3	Getting Part of a List with Slicing	AppG-2		
Appendix H: Dictionaries in Brief				AppH-1
H.1	About Dictionaries	AppH-1	H.3 Finding Data in a Dictionary	AppH-2
H.2	Creating Dictionaries	AppH-2	H.4 Modeling a Data Tree with a Dictionary	AppH-2
Appendix I: NumPy Overview				AppI-1
I.1	About NumPy	AppI-1	I.6 An Example—Stock Price Paths	AppI-7
I.2	Creating a NumPy ndarray	AppI-1	I.7 Input/Output	AppI-9
I.3	NumPy Item Data Types	AppI-3	I.8 pandas and NumPy	AppI-9
I.4	Index and Slicing—Accessing ndarray Items	AppI-4	I.9 Conclusion	AppI-9
I.5	Calculations	AppI-5		
Appendix J: Matplotlib Basics				AppJ-1
J.1	About Matplotlib	AppJ-1	J.4 Line Charts and the Legend	AppJ-8
J.2	Bar Charts, Titles, and Labels	AppJ-1	J.5 Stacked Bar Charts	AppJ-10
J.3	Pie Charts and Chart Size	AppJ-6	J.6 Comparing Subplots	AppJ-13
Appendix K: Working with Files and Directories Using the os Module				AppK-1
K.1	About the os Module	AppK-1	K.3 Some Additional os Functions	AppK-2
K.2	Using the os Module—Concatenating Files	AppK-1	K.4 Using <code>os.walk()</code> to Traverse Subdirectories	AppK-3
References				Ref-1
Index				In-1
